Exalate Gurus

Technology allows you to increase your revenue, scale your business, and do so much more! But it can also steal quite some time from you while you're getting up to speed. That's why we always recommend working with a partner. They can provide consistent support, show you how to make the most of the solution, and roll out the working solution in a matter of days.

That's why we present to you our best of the best Exalate Partners!

## Top 20 in Exalate Services

### Eficode

The logo for Eficode, featuring the word "eficode" in a lowercase, sans-serif font.

Certified Exalate Partner

Integration projects completed: 7

Their experts, coaches, and consultants advise on cutting-edge technology solutions,

infrastructure, security, strategy, and process optimization.

## Exalate Gurus

It's important to celebrate team effort, but it's also important to recognize the leading experts and fans within those teams. So we present to you our champions, who made integrations a part of their service portfolio and delivered those with admirable excellence.

(You go, guys!)

And here's what they say about Exalate, about how it benefits their organizations and their customers.

- [Aggelos Paraskevopoulos](#) (Cententia)

*When it comes to orchestrating cross-company workflows and satisfying sophisticated data synchronization needs for our customers, Exalate is the maestro! Awesome product with an excellent team behind it.*

- [Bogdan Gorka](#) (Demicon)

*I use Exalate every time there is a need to connect separate instances or separate Jira projects.*

*Thanks to the functionality of Exalate, it is possible to create a connection despite the rigid firewall settings or when permissions do not allow users from outside a secured project to see its full content.*

*Also, it is worth mentioning that Exalate, thanks to its scripted connection functionality, allows the implementation of various advanced scenarios. For me, what makes Exalate stand out from most Atlassian add-ons, is the fact that the documentation for this plugin is very extensive. When you need a script for your specific scenario, it is already waiting for you in the documentation.*

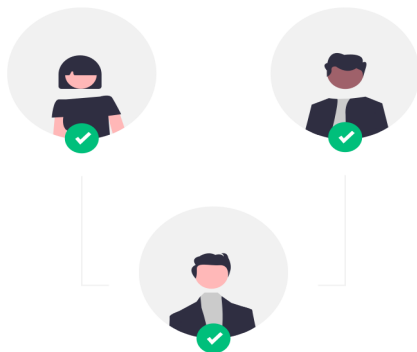

- [Berry Kersten](#) (Avisi)

*Application integration is still a hot topic. With the help of Exalate we have successfully helped various customers ranging from relatively simple to complex use cases. In the case of (technical) issues, Exalate Support has helped us quickly and decisively.*

- [Jorden Vanbogaert](#) (Brain2)

*Exalate has helped us collaborate in many ways. Our internal Jira instance is linked with multiple of our customers' Jira to keep track of all requests they have for us or to provide them insights into our development status. We have integrations across Cloud and on-premise with more complex network landscapes. Additionally, we have helped some customers integrate their Jira with ServiceNow to allow data reporting all from one centralized place. The flexibility of Exalate allows us to implement complex synchronizations rules beyond what seems initially possible. It's undeniably an essential part of our day-to-day business.*

- [Jorge Jerez Ibanez](#) (Inlogiq)

*For InlogiQ, Exalate has streamlined the implementation of Jira when our customers require synchronizations or integrations with other tools.*

*During 2021 we have carried out different implementations with Exalate, we have synchronised Jira Server with Jira Data Center, Jira DC with Cloud, or Jira Cloud with Azure DevOps, among others.*

*For our customers, this means the security of not having to maintain their own synchronization tools, in addition to the security and stability that is provided by Exalate.*

- [Daniel Miks](#) (Eficode)

*As an Atlassian Consultant setting up synchronizations for my customers, it is almost too easy with Exalate. The app helps me look like an absolute expert and with the easy setup you can have an advanced setup up and running in less than an hour. For basic ones less than 10 minutes. You can even use the graphical interface with no knowledge of Groovy coding. So the app is for all Jira roles actually, from hardcore coding administrator to more or less Jira newbie. And finally, thank you iDalko team for the absolute outstanding support.*

- [Erich Sowell](#) (bit2bit Americas)

*Exalate is the best tool on market for synchronization between our customers' principal products, whether Jira to Jira, Jira to Salesforce, Jira to Zendesk, Jira to ServiceNow, Jira to Azure Devops and so on and so on and so on. Our customers love the flexibility of integration with the ability to scale without performance issues.*

- Alvaro Jardon (Tecnofor)

*We have been working closely with Exalate's team for many years, and they are always ready to help and provide the fastest response and the most efficient solution for us or our customers. There are many customers that we have been able to help thanks to Exalate, either integrating two or more Jira instances or with other tools.*

*Exalate allowed us to automate most of the processes and reduce the manual work, redirecting the requests to the team that corresponds and simplifying their work. Exalate applications guarantee the security of the information that is shared on the different platforms.*

- Yaakov Shami (Methoda)

*The flexibility of Exalate allowed us to creatively fulfill all our needs. I never received such treatment from any other add-on - you're the most professional and most fluent about your product (which is awesome, btw) and I always enjoyed talking to you and our meetings, even when there were problems.*
